

**THE  
90 DAYS TO RICHES  
ACTION PLAN**

## The 90 Days to Riches Action Plan (eCourse pt. 2)

I've pounded the table about this and will keep pounding.

You can't learn from watching. You can't learn from reading. You need to learn by doing.

It's ok to make mistakes. You should expect to make mistakes. Nobody is perfect on their first try.

That's why I recommend starting small. Buy just one share of a stock. Watch it, then slowly buy more.

Make rookie mistakes while the money amounts are small. If more people did this there would be fewer and fewer stories of people losing it all.

You'll look back in 90 days and be shocked with how much you've learned.

Investing takes time to absorb. There's no magic pill to success. It doesn't come to those who wait. Intimidating, sure. Impossible? Never.

I'll show you how easy it is to buy a stock from a broker. Then there's no excuses.

The best online broker I can recommend for buying your first stock is TradeKing.

This broker is one of the few who don't require a minimum initial deposit. Most brokers want \$500 or more.

Plus they only charge \$4.95 per trade compared to most at \$6.95 or \$9.95.

See for yourself.

### **Firstrade**

\$6.95 stock trades  
No account minimum

### **ETrade**

\$9.95 stock trades  
Account Minimum: \$500

### **TradeKing**

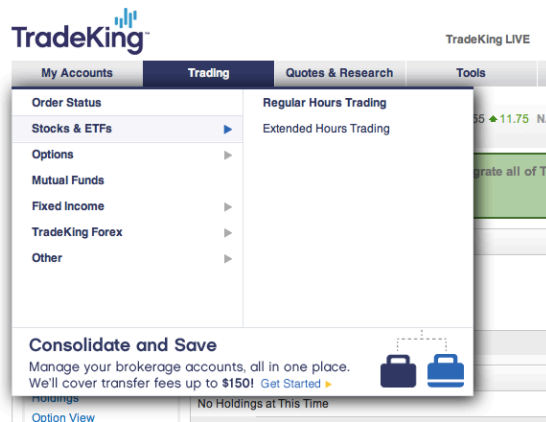

\$4.95 stock trades  
No account minimum

Pick the broker you are most comfortable with, then let's move on. I use TradeKing.

## 4 Easy Steps to Buy a Stock

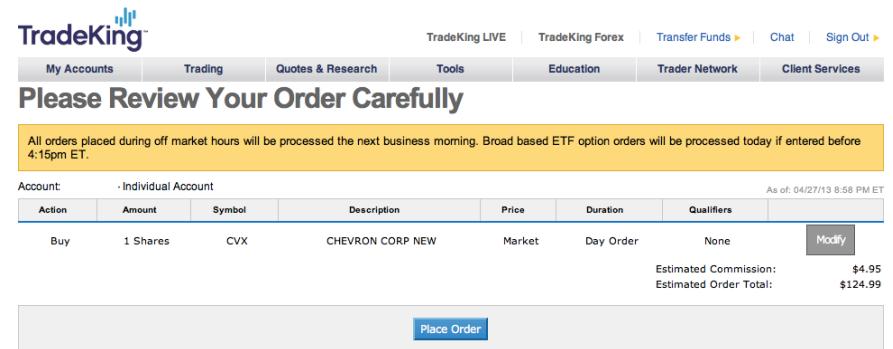

1. From the home page, highlight the "Trading" tab and then select Stocks/ETFs -> Regular Hours Trading.

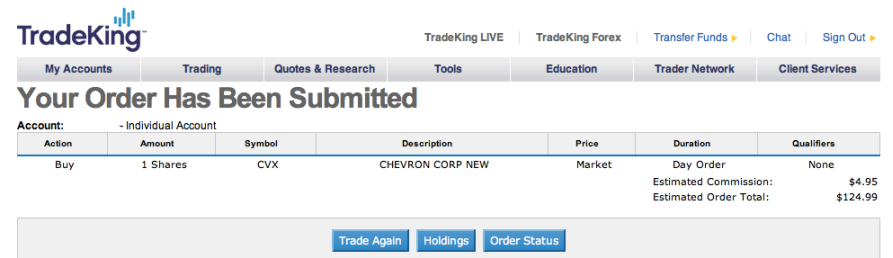

2. Next, fill out the information with the number of shares you want, the stock ticker, and also select Market for a regular buy.

3. Review the information and make sure you didn't make any mistakes

4. That's it! Congratulations, you've just bought your first stock.

For all the complexity of the markets and Wall Street, buying a stock itself sure is easy.

Many people don't know that. It's a shame.

I hope I've made it as easy as possible for you to jump into the markets.

With today's economic conditions, you can't just let your cash sit under your mattress.

Everyday your money isn't invested is a day you are losing to inflation. Stop fighting the forces in this world. Side with them instead.

Become friends with time instead of enemies, and watch as the magic of compounding interest grows your capital.

More and more investors are taking control of their own investments.

They are learning how to invest intelligently.

It isn't that hard. But so many people are just too lazy or too trusting. You work so hard for your money, why not spend some time to protect it?

I'm glad for your sake that you've decided to take this eCourse. I can't know if you will take action like I've been pleading, but I hope you do.

There's one last step to the eCourse, and it involves an opportunity to speak with me for a

short interview over Skype.

I can't promise that I'll be able to offer this service in the future.

Take advantage while you can.

Zig Ziglar had a great quote once, "You can have anything in the world that you want, as long as you get others what they want."

I truly believe in this wisdom, and so I want to help as many of my readers as I can.

Wealth isn't just transferred or stolen. Wealth is created. Every day more of it is created, by people who make the conscious effort to.

I hope to create more wealth than I can possibly imagine. For myself, my family, my friends, my readers, my community, my country.

And so I've offered all I can to get you started.

**What happens next is up to you.**

*At no cost to you, I get paid a commission for referring you to the brokers listed above. Thanks for your support. Let's create wealth together.*
